25 APR 1960

MEMORANDUM FOR: Record

SUBJECT : Operational Report of Mission 4156

1. The overall quality of the tapes, with the exception of one discrepancy, was very good.

2. The one discrepancy was a rather high amplitude 400 cps tone present throughout the entire "P" band recording. The "S" band was not affected by this condition.

3. All other aspects of the mission were acceptable with no cause for further comment.
